

FACTSHEET

Beef Suckler Scheme

The idea behind this scheme is to package the most important routine and preventative health measures into an annual plan that is paid for by a monthly membership fee. It represents really good value for money and the pay off for us is to be more involved with the farm and to enable more efficient planning of routine tasks.

The scheme includes:

Scanning all cows for pregnancy

Testing all stock bulls for fertility

Blood sampling young calves to check colostrum intakes

Checking "high risk" cows after calving to look for endometritis

Developing and updating a herd health plan

Performance monitoring and benchmarking

There are also some financial perks:

A cheaper hourly rate for all other work

A day time visit fee for out of hours emergencies

A discount on drug prices

We already have many of our beef farmers signed up to the suckler scheme, please talk to us if this is something you have interest in.
